

CAREER SUMMARY

U.S. Air Force professional with 5+ years of Power Platform and data engineering experience, delivering workflow automation, Power Apps solutions, SharePoint administration, and Power BI reporting. Supports 300+ SharePoint sites across 3 networks and creates/ maintains enterprise workflows serving an organization of 49,000+ personnel. Combined requirements gathering, application delivery, and information governance with earlier avionics experience using SharePoint and Power Apps to track aircraft maintenance and sorties.

TECHNICAL SKILLS

SharePoint Administration (Modern & Classic) | Power BI Development | Power Automate Workflow Engineering | Power Apps (Canvas Apps and Model-Driven) | Data Modeling & Metrics Tracking | FOIA & Records Management | Microsoft 365 (NIPR/ SIPR/JWICS) | Nintex Workflow Development | API Integration (Basic) | HTML/CSS Customization | Secure System Administration | Process Automation & Optimization

PROFESSIONAL EXPERIENCE

DATA ENGINEER | United States Air Force / 16th Air Force | San Antonio, TX
Clearance: Active TS/ SCI

2021 - Present

Administered and maintained a SharePoint site collection of 300+ sites across NIPR, SIPR, and JWICS, ensuring secure, uninterrupted operations in a classified environment. Contribute to multiple Power Apps and workflow-based solutions, supporting full lifecycle development from requirements to deployment. Ultimately, drive data analyst/engineering roles to create solutions and bridge gaps across data, driving insights/ key decisions for the 16th Air Force.

- Personally, developed all 30 custom Power Automate flows integrated with Power applications for an enterprise tasking system within approximately three months, automating task parsing and response communications for a process reliant on manual Outlook email traffic and ESSS-formatting improving task turnaround time and reducing email processing.
- Built response-email workflows routing communications between customers, supervisors, and task approvers, automating the back-and-forth exchanges used to coordinate tasking responses and approval handoffs, resulting in faster approvals and reduced coordination delays.
- Partnered with Software Developers to integrate automations with Power Apps interfaces, SharePoint task data, and Power BI Dashboards, delivering a coordinated tasking solution with real-time status visibility, automated notifications, and leadership reporting, providing refreshed leadership visibility.
- Translated business process requirements into Power Apps forms, approval workflows, and data-driven interfaces; contributed through requirements gathering, design, testing, and deployment to deliver applications supporting customer workflows and improving workflow efficiency.
- Addressed company readiness and personnel reporting needs by designing and deploying interactive Power BI dashboards with Power Apps data entry apps, giving leadership views of personnel tracking and operational metrics to support decision-making, further enhancing leadership decision-making with accurate metrics.
- Connected SharePoint lists and API-based data sources to Power Applications and Power BI dashboards for a customer requiring hardware tracking, bringing operational information into dashboards used for mission reporting and analysis. This centralized hardware tracking and improving missions report accuracy.
- Administered 300+ SharePoint sites across 3 enclaves, to support enterprise collaboration, configure site content, lists, and document libraries for organizational information management in secure environments, ultimately maintaining secure collaboration and reducing content management issues.
- Built model-driven Power Apps applications for training and participated in Microsoft Dataverse training during data engineering training assignments, developing hands-on familiarity alongside operational Power Platform utilization, ultimately strengthening capability and accelerating training development.

- Resolved SharePoint and Power Application requests involving content organization and interface changes as well as permission management for over 40k personnel, ultimately using permission group management by using Power Apps and HTML/CSS to deliver site changes aligned with user requirements and maintain personnel readiness, improving site usability and readiness.

KNOWLEDGE MANAGER/ SHAREPOINT SCA |
United States Air Force | San Antonio, TX

Nov 2021 - February 2024

Clearance: Active TS/ SCI

- Supported information governance across 16th Air Force headquarters and subordinate wing commands through FOIA and records management program support, helping organizational records meet retention standards and governance requirements. This ensured compliance with retention standards across the 16th Air Force and subordinate wings.
- Addressed accessibility requirements for federal and DoD records and websites as a Section 508 subject matter expert, providing guidance to support accessible enterprise content, improving accessibility compliance for enterprise content.
- Supported headquarters and subordinate commands with publications and forms program responsibilities, helping maintain the information resources used to document and carry out organizational processes.
- Delivered briefings and training on knowledge management, SharePoint, and Power Platform content management, and digital organization, giving personnel practical guidance for organizing information and maintaining site content.
- Modernized legacy SharePoint solutions by migrating content and functionality to modern environments for over 95 sites/subsites, rebuilding over 20 Nintex workflows in Power Automate, delivering updates to sites, and replacing process automation. This improved site performance and replaced outdated workflows with modern automation across the 16th Air Force's site collection.

AVIONICS TECHNICIAN |
United States Air Force | San Antonio, TX

Dec 2020 - 2021 November

Clearance: Secret

- Supported bomber aircraft communications and navigation maintenance at first duty station, using SharePoint and Power Applications to track maintenance activity and sorties as well as support operational reporting, enhancing sortie readiness and maintenance reporting accuracy with new innovative tools.
- Organized and deployed SharePoint content and file structures for maintenance and sorties tracking, providing a structured location for the information used in daily aircraft maintenance operations, therefore reducing time spent locating maintenance data and improving workflow clarity.
- User Power Applications and provided basic application development support for maintenance and sortie tracking, applying firsthand maintenance experience to support the digital tools used by the avionics team. This greatly increased digital tracking efficiency for the avionics team.

PROJECTS

Enterprise Tasking Automation System (2024)

- Collaborated with full-stack Microsoft developers to build a tasking solution integrating Power BI dashboards, Power Apps interfaces, SharePoint data, and 14 Power Automate flows.
- Enabled real-time task visibility, automated notifications, and streamlined reporting for leadership.

Power BI Operational Dashboards (2023–2026)

- Designed and deployed dashboards supporting mission readiness, personnel tracking, and operational metrics.
- Integrated API-based data sources and SharePoint lists to support data-driven decision-making.

SharePoint Modernization & Workflow Migration (2022)

- Migrated over 300+ legacy SharePoint (classic) solutions to modern environments.
- Rebuilt Nintex workflows and automated processes using Power Automate.

Power Apps Development (2021–2026)

- Contributed to multiple Power Apps solutions, including forms, approval workflows, and data-driven interfaces.
- Supported full lifecycle development: requirements, design, testing, deployment.

EDUCATION

BACHELOR'S DEGREE (In Progress) | Information Technology Management | Western Governors University
 2026 – Current (5 courses to completion)

CERTIFICATIONS/CLEARANCE

Top Secret Clearance - Active
 PL-300: Microsoft Power BI Data Analyst Associate - In Progress
 CompTIA Security+ - Planned

AWARDS AND RECOGNITION

- United States Air Force Achievement Medal for contributions to innovation
- Squadron/Group recognition for "Outstanding Data Operations Airman."
- Multiple quarterly award winner
